This is an AACR2 record.

Why?

1. In the fixed field, the Descriptive Cataloging Form, Desc, is "a"

2. In the 040, there is no $e rda

3. In the body of the record, there are no RDA elements such as 336, 337, 338 fields
This is an RDA record.

1. Desc is "i"

2. The 040 has the RDA

3. And there are 336, 337, 338 fields
This is a hybrid record. That is, it's an AACR2 record with some RDA elements added:

1. Desc is "a"
2. 040 has no $r field
3. But there are RDA elements such as 336, 337, and 338 fields

This just has an error.
There should not be records coded Desc 'a' plus an 040 #e rda.
